

Environment Policy

Nestlé respects the environment, supports sustainable development and is committed to environmentally sound business practices.

Nestlé is aware of being a part of community and undertakes initiatives to promote greater environmental responsibility to protect the environment through sustainable and continual improvement.

The protection of the environment is the responsibility of all Nestlé employees who contribute their efforts to achieve the requirements of the Environmental Management System and Alliance for Water Stewardship Standard (AWS).

To fulfill this commitment, Nestlé:

- Attempts to engage relevant stakeholders throughout its efforts in an open and transparent manner and that the site complies with all environmental legislation, water-related legal and regulatory requirement and Nestlé's own Environmental Management System.
- Establishes and regularly reviews objectives and targets to support the conservation of natural resource, energy saving and the prevention of environmental pollution.
- Strives for the continual improvement of environmental performance and adapt its water stewardship actions, plans and ensure that there is sufficient organizational capacity to successfully implement the Nestlé Environmental Management System (NEMS) which complies with the International ISO14001 Standard and Alliance for Water Stewardship Standard (AWS) by
 - Implement and disclose progress on water stewardship programs and continuously improve related activities to achieve improvements in Alliance for Water Stewardship Standard outcomes.
 - Implementation will align to and in support of existing catchment sustainability plans
 - All stakeholders will be engaged in an open and transparent way
 - The resources will be allocated to implement the AWS Standard.
- Promotes and encourages environmental awareness among employees through regular training, effective communication and supports involvement in environmental activities.
- Respects the right of employees, contractors on-site and community to have access to safe water, adequate sanitation and hygiene.
- Coordinates with and supports public-sector agencies in their efforts to encourage water-related planning and implement water-related policies.

In this context, the company is committed to provide adequate resources, ensure communication, and disclose of its environmental policy and material on water-related information to all relevant audiences in an appropriate format.
